Re: MASINGA / KITUI PIPELINE WATER SUPPLY PROJECT (MKP)
CIVIL WORKS SUB-CONTRACTOR
Oriental Construction Company Limited

We confirm that Messrs. Oriental Construction Company Limited were our main Subcontractors, in charge of the civil works, on the Masinga Kitui Pipeline Water Supply Project. The scope of their works included:

- Construction of Treatment Works, capacity 360 m³/hour; including storage tanks, chemical building, flocculation, sedimentation and filter basins, pumping station, administration building, roads and drainage works.
- Construction of Staff Housing Compounds, total of 13 houses
- Construction of Storage Reservoir, capacity 2000 m³
- Civil Works for 51km of pumping main

Presently the civil works for the Project are 99% complete; the outstanding finishing works are expected to be finished by Contract Completion in November 1998.

Oriental provided the necessary resources to complete the works to the programme and specifications required on the Project. They had at their disposal adequate equipment and staff with the technical qualifications and experience to complete the works satisfactorily.

The excellent quality of workmanship that Oriental have provided in their civil works on this and previous Projects that we have worked together on has been appreciated by all concerned.

Yours faithfully,

A handwritten signature in blue ink, appearing to read "J.L. Servranckx".
